

AUSTRALIAN-MADE WATER INFRASTRUCTURE

PRODUCT SHEET

Inline Check Valves

HWS manufactures heavy-duty inline check valves designed to prevent backflow and protect irrigation and pumping systems.

Built for demanding systems

- Prevents backflow and protects pump systems
- Reliable one-way flow control
- Heavy-duty fabricated construction
- Hot-dip galvanised for corrosion protection
- Suitable for irrigation and industrial applications
- Australian-made in six nominated NB sizes

Made to suit your pipework.

Manufactured to suit new installations or existing infrastructure, with connection details and dimensions confirmed for each project.

HWS manufactured size range

NOMINAL SIZE	TYPICAL OD	AVAILABILITY
500NB	508 mm	HWS manufactured size
650NB	660 mm	HWS manufactured size
750NB	762 mm	HWS manufactured size
1000NB	1016 mm	HWS manufactured size
1200NB	1219 mm	HWS manufactured size
1500NB	1524 mm	HWS manufactured size

Important: Outside diameters shown are typical for the nominated spiral-welded pipe sizes. HWS confirms the actual pipe OD, wall thickness, operating conditions and connection arrangement before manufacture.

Available in six HWS sizes.

Talk to HWS about your application and pipe dimensions.
